Subject: RE: Leviathan Mine Site - Final Reference Area Focused Remedial Investigation Work Plan
EPA comments on March 2016 Reference Work Plan 11.18.16.pdf

Fred,

We were hopeful as well.

For background, here again attached are EPA comments on that last version of the Reference Area workplan March 2016.

The various documents /deliverables (that have prepared on this topic) are described in the history section of those EPA comments,

and you can also see the history of documents outlined in this summary of documents below.

It does get very confusing when there are so many comments going back and forth. And Many EPA keeps repeating.

One of the ARC responses to EPA groundwater comments ---has remained incomplete for at least the last two revisions.

EPA continues to discuss the need for reporting/ receiving the reference data to begin to review

Rather than find ourselves repeating earlier EPA comments----we should consider an approach I've used before.

ARC can submit a simple statement in a one page letter to EPA---stating that they concur with all EPA comments and the revised document is attached or will be submitted by xxx.

And/Or identify the one or two they would like to discuss further.

It would make things a lot simpler.

Lynda

I guess we were hopeful at the time that version was submitted.

Thanks,
Marc

Plan

Thanks Marc I'll keep you posted. BTW I have a CD titled ' Final Reference Area FRI Work
Plan", but it is dated March 3, 2016. ????
